

We ensure more security in the connected world! Enhanced cybersecurity for the digital future

Your partner for secure solutions

achelos is a consultancy and systems provider for cybersecurity and digital identities. As an independent provider, we develop robust solutions and offer service packages in various expansion stages for secure products and applications. For our customers we translate security standards into viable solutions in line with the requirements of compliance.

Our focus is on the following sectors:

- **Cybersecurity**
Security right from the get-go – prevention and protection for critical application fields where security is paramount
- **Health**
Combining our expertise in eHealth and IT security to ensure maximum security and quality in the healthcare sector
- **Industry**
Security engineering and key management for maximum cybersecurity in the age of Industry 4.0
- **Public**
Enhanced security to protect digital identities in the public sector
- **Payment**
Certification and security to usher in a digital future
- **Connect**
eSIM solutions for today's demands and tomorrow's possibilities

Your direct access to know-how and technologies

We offer a broad portfolio of services and support spanning the entire development process of your products, encompassing comprehensive cybersecurity competence and innovative solutions.

Our portfolio for cybersecurity:

Secure software

Development of certifiable software in line with the 'security by design' principle

Security consulting

Professional guidance from our experienced security experts

Approval support

Support with approval and auditing in compliance with relevant standards

Test suites & simulations

Automated test suites and powerful simulations

Industry solutions

Intelligent solutions for industry-specific requirements

System integration

Setup, migration and operation of PKI systems with full control over costs

Quality firmly anchored in the corporate values

We combine our expert know-how with reliability and transparency to maintain our high standard of quality on a permanent basis.

Expert know-how

Our team consists of recognised experts for cyber-security and digital identity management. With our qualified expertise and strong technological competence, we are highly motivated to push forward and make a connected future which offers greater security each day.

Reliability

Our range of services complies with the strictest standards of quality. We implement our projects in accordance with defined and agile processes. Our solutions and services are highly efficient, secure and represent the utmost quality.

Transparency

Transparency in our communications – particularly in interaction with our customers – is part and parcel of achelos' quality policy. We foster a trustworthy and cooperative business relationship with our customers, working in accordance with clearly defined processes and maintaining an open and transparent corporate culture.

achelos creates greater security in a connected world

At achelos, our customers' requirements take centre stage. We focus on first-class advice, efficient processes, and a strong network of partners to achieve the best possible solutions for our customers.

Benefit from our many years of experience from numerous projects!

We support you efficiently and flexibly in the development, integration and certification of secure products and customised solutions.

achelos is certified according to ISO 9001, ISO 27001 and Common Criteria.
