

DMEA 2025 – Connecting Digital Health
achelos to present efficient cybersecurity solutions

achelos, a consulting and system provider for cybersecurity and digital identities, will be represented at DMEA, Europe’s leading event for digital health, from 8 to 10 April. This year, achelos will be focussing on digital identities and cybersecurity in the healthcare sector. achelos security expert Mario Kemper will deliver an insightful presentation on BSI C5 and cloud security.

Paderborn, Germany on 25/03/2025: DMEA – Connecting Digital Health 2025 will be held at the Berlin Exhibition Centre from 8 to 10 April this year. More than 18,000 visitors are expected to attend Europe’s leading trade fair for a digital healthcare sector, where experts in IT, medicine, science, the economy and politics will meet. Topics will include artificial intelligence, personalised medicine, electronic patient files in everyday healthcare and the future of interoperability, among other things.

This year, Paderborn-based achelos GmbH will present itself at the trade fair under the motto: “Digital Identities and Cybersecurity in the Healthcare Sector”. As a bronze DMEA partner, achelos will showcase its solutions for secure and efficient digitalisation in the healthcare sector at Stand B-105 in Hall 6.2.

achelos will be focussing on the follow topics there:

- TI services: Development, testing and approval support
- Health ID: from development to integration to safeguarding
- C5/ISMS: Certification and long-term IT security strategies
- TI Messenger: comprehensive support in obtaining gematik authorisation
- TI Simulator: flexible simulation environment for telematics infrastructure
- Digital identities & cybersecurity in the healthcare sector: advancing into TI 2.0 successfully and securely

“DMEA is the industry event of the year, and we’re looking forward to presenting our services and products as a bronze partner once again,” remarked Thomas Freitag, Managing Director of achelos. “Cybersecurity and the protection of sensitive data in the cloud are achievable. We’ll show you how.”

achelos security expert Mario Kemper will be illustrating the importance of BSI C5 for cloud security together with Volker Reers of Qseidon GmbH at 2:15 p.m. on Wednesday, 9 April, 2025 at the Solution Hub (HUB 1 in Hall 1.2). They will explain why BSI C5 is the gold standard for cloud security in the healthcare sector and how sensitive patient data can be securely protected.

Gorden Bittner, Thomas Freitag, Holger Volke and Carola Schwarzenberg look forward to exchanging expertise with you at the achelos stand. Appointments can be scheduled in advance here: <https://www.achelos.de/en/dmea-2025/>.

About achelos:

achelos GmbH is a consultancy and systems provider for cybersecurity and digital identities founded in Paderborn in 2008. The independent provider develops robust solutions and offers service packages in various expansion stages for secure products and applications. For its customers from the fields of healthcare, industry, the public sector, digital payment and telecommunications, achelos translates security standards into viable solutions in line with the requirements of compliance. Customers benefit from this holistic approach – from consulting and conception to software development and certification, through to secure operation. achelos is certified according to ISO 9001, ISO 27001 and Common Criteria and has a prestigious network of partners.
